

nevolus.

Intelligent infrastructure for evolving businesses.

WHAT WE DO

Since 2000, we have been a reference in cloud computing infrastructure and operations in Brazil.

We provide cloud servers, VPS, private clouds, 24/7 management, AI automation, and protection for mission-critical businesses.

Our solutions are easy to use, predictable, and delivered with premium support.

nevolus.

WHY NEVOLUS?

The experience of a team that operates thousands of mission-critical systems.

Specialists connected to your business.

Cloud computing with cost predictability, security, and scalability.

nevolus.

CLOUD COMPUTING

KVM Lite: burstable VPS with a baseline CPU usage threshold, ideal for applications with lower resource consumption and development environments.

KVM Server: VMs available in predefined families, with fixed CPU, memory, disk, and data transfer resources. Delivered at a fixed, predictable monthly price.

KVM Flex: offers nearly unlimited virtual server configuration options. Delivered with on-demand pricing, calculated by the hour of use.

CLOUD SERVERS

powered by:

 **PROXMOX**

nevolus.

CLOUD COMPUTING

Private Cloud: an exclusive Nevolus solution that provides an environment for provisioning systems with high configuration flexibility.

Gain cost predictability to run your applications without having to manage dedicated servers or virtualization platforms.

With Private Cloud, you reserve computing resources and use a self-service panel to create VMs, backups, and firewall rules, operating your own virtual data center.

DATA CENTER

powered by:

nevolus.

ARTIFICIAL INTELLIGENCE

nevolus.

AI Chatbots: integrate AI chatbots into your site or app and gain efficiency.

Create intelligent chatbots that streamlines specialized customer service.

Our tools make it easier to use your own content to train chatbots.

Your data remains confidential, and your conversations are not shared with AI engines.

AI Automation: connect intelligent agents to your business processes.

Create AI-powered automated workflows to execute tasks, query systems, analyze information, and accelerate operational routines.

Use frameworks such as n8n, OpenClaw, and Hermes Agent to integrate AI with APIs, databases, messaging systems, CRMs, ERPs, and internal channels.

SERVICES

nevolus.

CLOUD OPS

24/7 Monitoring and Operations Center to support cloud applications.

RESOURCE DEPLOYMENT

Deployment of resources in cloud environments or virtual data centers.

PROTECTION AND SECURITY

Anti-DDoS protection, Firewall, VPN, and Load Testing.

TECHNICAL CONSULTING

Architecture projects, performance analysis, and cloud usage optimization.

CLIENTS

Hundreds of companies rely on Nevolus cloud computing.

OUR PEOPLE

We constantly pursue improvement, overcome challenges, and create a positive impact in the market.

Beyond technology, people are our greatest differentiator and enable us to deliver the best cloud computing service in the country.

Certified by Great Place to Work and recognized among Brazil's best companies to work for in Information Technology.

Intelligent infrastructure for evolving businesses.
